Office Action Summary	Application No. 10/532,928	Applicant(s) DOOLEY ET AL.	
	Examiner Fred H. Mull	Art Unit 3662	

– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 September 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Drawings and Specification

1. The drawing is objected to because it contains the label "FIG. 1". This label should be removed from the drawing. 37 CFR 1.84(u)(1) states that when there is only a single drawing, it must not be numbered nor include the label "FIG", and that in the specification it should be referred to as "the Figure". Appropriate corrections to the drawings and specification are required.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Ghaem.

In regard to claim 4, Ghaem discloses:

a GPS receiver (28, Fig. 2);

an omnidirectional antenna (30); and

a directional antenna (31);

wherein the GPS receiver is configured to acquire a GPS signal from the output of the directional antenna alone (col. 8, lines 53-67; col. 9, lines 29-38), where the GPS receiver acquires a GPS satellite for determining the device orientation. Note that the GPS receiver switches (29, Fig. 2; 75, Fig. 5) from the omnidirectional antenna to the directional antenna, so that the directional antenna alone is being used.

In regard to claim 1, Ghaem further discloses that the device acquires a second GPS signal from the output of the omnidirectional antenna alone (col. 2, lines 23-27), where the omnidirectional antenna acquires GPS signals that the directional antenna does not, and the switch is connected to the omnidirectional antenna alone.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ghaem.

Ghaem discloses directing a user of the GPS receiver to point the GPS receiver in a direction from which a GPS signal is most likely to be acquired (col. 9, line 59 to col. 10, line 24).

Ghaem fails to disclose instructions directing the user to operate the device in the intended manner.

It would have been obvious to provide an instruction manual with the device in order to ensure that the user is able to use the device and thus is happy with the device and keeps it instead of returning it.

4. The examiner also finds the following reference(s) relevant:

NavTalk Cellular Phone/GPS Receiver: Owners Manual and Reference Guide, which is an example of an instruction manual that accompanies a GPS device that instructs the user how to operate the device in the intended manner.

Applicant is encouraged to consider these documents in formulating their response (if one is required) to this action, in order to expedite prosecution of this application.

Allowable Subject Matter

5. Claim(s) 2 is/are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fred H. Mull whose telephone number is 571-272-6975. The examiner can normally be reached on Monday through Friday from approximately 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas H. Tarcza can be reached on 571-272-6979. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
